

CONTAINER TRANSPORT MELBOURNE

Reliable container movements for ports, warehouses, worksites and businesses across Melbourne and beyond.

Safe handling, practical equipment and dependable coordination for your container transport needs.

Container Transport Solutions

Auslink Logistics provides container transport solutions for moving freight between ports, rail terminals, warehouses and customer sites. A range of trailer configurations helps businesses plan container movements around cargo type, container size, access conditions and delivery location.

Transport Equipment and Capabilities

- **20ft and 40ft container trailers:** For transporting standard shipping containers across metropolitan, regional and interstate networks.
- **Sideloaders:** Useful at locations where a crane or forklift may not be available and ground-level container placement is required.
- **Skel trailers:** Designed for container movements between terminals, warehouses and customer premises.
- **Retractable trailers:** Flexible equipment for containers of different lengths, subject to transport requirements.
- **Overweight and over-dimensional transport:** Specialised planning, suitable equipment and coordination of applicable permits and route requirements.
- **VGM and weighbridge services:** Weighing support to help customers meet applicable Verified Gross Mass and shipping requirements.

Who Can Benefit?

These services can support importers, exporters, freight forwarders, manufacturers, distributors, warehouse operators and construction businesses that need containers moved between logistics locations and final delivery sites.

A Practical Approach to Every Movement

- **Equipment matched to the job:** trailer options to suit different container sizes and freight needs.
- **Site-aware planning:** consider access, loading and unloading arrangements before dispatch.
- **Safety and compliance:** planning that takes applicable road rules, permits and load requirements into account.
- **Connected logistics support:** access to wider transport, warehousing and container pack/unpack capabilities where required.

Plan Your Container Delivery

To request a quote, share your container size, collection and delivery locations, preferred timing, cargo weight and any site-access or unloading requirements. For overweight or over-dimensional loads, provide dimensions and relevant freight details so the team can assess the transport requirements.
