CosmediCheck offers an independent platform that focuses on clear evidence, helping both clients and professionals across the UK and Ireland. The service reviews qualification and training documents and confirms insurance directly with the insurer at the point of verification. Profiles then publish what has been checked so people know exactly what has been validated. The platform supports cosmetic and aesthetics professional verification with structured reviews against more than 30 published standards. Clients can use the evidence shown on each profile to check an aesthetics professional before making a booking decision. Verification certificates and profile badges help professionals present confirmed details without overclaiming or relying on general statements. The approach is route-blind and based on standards and proof, giving a consistent way to compare information from different practitioners. For ongoing support, verified members can use managed websites through CosmediSites and connect with peers in The Cosmedi Network. Together, these tools help the community share transparent information and be found by people seeking proof.
