

SERVICE 1

ANDROID GAME DEVELOPMENT

We develop Android games here at Knick Global, using advanced animations, high performance and an engaging style. Using Unity, Unreal Engine and Android Studio, our developers develop mobile games that work perfectly across a variety of devices. Every Android game we bring you is meant to be smooth, fast and enjoyable to play.

ABOUT US

- Knick Global stands at the forefront of innovation as a world-renowned leader in Game Development, Mobile App Development, and Web Solutions, powered by the latest in AR/VR and AI/ML technologies. With a solid presence across the USA, Australia, the United Kingdom, and the United Arab Emirates, we deliver transformative digital experiences that set our clients apart. From immersive 2D/3D games, Unity and slot game development, to complex RTS, MOBA, simulation, and multiplayer shooters, we bring visions to life with precision and passion. Whether you're building the next mobile gaming sensation or a full-scale interactive platform, Knick Global delivers end-to-end solutions tailored to your goals.

SERVICE 2

IOS GAME DEVELOPMENT

High-performance iOS games for Apple's ecosystem are developed by Knick Global. With Swift, Objective-C, and advanced game engines, we develop entertaining and vibrant games that match App Store rules and work well on both iPhone and iPad. We mainly focus on ensuring that users have smooth controls and a nice appearance and continue enjoying the game.

SERVICE 3

GAME DEVELOPMENT

As a game development studio, Knick Global helps bring ideas to fruition on mobile, web, PC and console platforms. We go from creating a concept through prototyping, design, development and deploying applications for our clients. From a solo game with an immersive story to a big multiplayer experience, we make sure every game is exciting, of high quality and supported by both technical and creative efforts.

SERVICE 4

GAMBLING GAME

We develop Android games here at Knick Global, using advanced animations, high performance and an engaging style. Using Unity, Unreal Engine and Android Studio, our developers develop mobile games that work perfectly across a variety of devices. Every Android game we bring you is meant to be smooth, fast and enjoyable to play.

SERVICE 5

AUGMENTED REALITY GAME DEVELOPMENT

Knick Global is changing how games are interacted with through the use of AR. Using ARKit, ARCore, and Unity, we connect real worlds to games that make them both fun and engaging. Our apps, whether in the form of AR games, location-based escapes, or puzzles, draw people in with the imagination they create from being in the real world.
