

**ARTIFICIAL INTELLIGENCE (AI) USE DECLARATION FORM FOR
STUDENT ACTIVITIES**

Student Name : Aspillaga, Joaznier A
Program : BS SciEd 2A
Course : EDU 222 (Technology for Teaching and Learning 1)
Date : 06/22/25
Title of Activity : Task 1 and 2
Instructor : Mr. Jason M. Madronero

ARTIFICIAL INTELLIGENCE USE DECLARATION

I hereby declare that I have used _____ for _____.

I understand that the use of Artificial Intelligence (AI) for student activities is limited to the following ethical purposes:

- Proofreading
- Generating ideas
- Plagiarism checking
- Improving formatting
- Other ethical uses of Artificial Intelligence

Furthermore, the prompts I used with AI tools were as follows:

1. Check Grammar
- 2.
- 3.

I hereby affirm that the content of the document is originally created and complies with the ethical standards of using Artificial Intelligence in student activities. I acknowledge that I am responsible for my own work and understand that any violation of this AI Use Declaration Form will result in a **failing mark**.

Aspillaga, Joaznier

Signature over printed name

Received:

JASON M. MADRONERO, LPT, MEd
Instructor's signature

Feedback:

Note: This AI use declaration form is to be used only in the courses of Mr. Jason M. Madronero.

Task: 1

How technology Influenced My Life as a Learner

Technology influenced my life starting in my high school days. Back then, we learned how to use computers and conduct tests online. We also used Google Meet to attend online classes whenever there were problems with face-to-face sessions. I also learned how to use technology apps to communicate, like Facebook and Messenger. Watching tutorial videos on YouTube helped me learn how to do various things. Technology has made learning easier because you can simply search on Google, and the answers you're looking for will appear. I feel lucky to have access to technology because with it, learning doesn't stop after school. Anyone can take online courses, watch tutorials, or discover new things anytime.

Task: 2

How will I Use Technology When I become a Teacher

When I become a teacher, I will use technology like Google Meet and Zoom to help my students learn, whether in online or face-to-face classes, and to make learning easier. I will also use Canva, videos, and PowerPoint to make my lessons interesting, engaging, creative, and more effective for my students. In addition, I will use Google Classroom to share assignments, activities, and learning materials so my students can access them anytime, even at home. For communication, I will use Messenger or email as tools to answer students' questions or help them with their concerns. I will also encourage my students to explore educational videos, websites, and online resources to help them learn independently. Lastly, I will do my best to teach technology to my students and to use it myself in an effective way to continue learning and improving as a teacher.
