How to withdraw winnings with a 1xBet promo code?

Withdrawals are available once the rollover is complete, including both sports and 1xGames bonuses. As long as a bonus remains active, the balance, including deposited funds, remains locked. Once the conditions are met, winnings are transferred to the main account and become withdrawable.

The process takes just a few seconds from the "Withdrawal" section: choose the method, enter the amount, and confirm. The first withdrawal triggers an identity verification (KYC) process, requiring a valid ID and sometimes proof of address. During our test from Cameroon, the validation took just under 24 hours; allow longer over a weekend.
